RE: Inclusion in the General Motors approved lab network

Dear Mr. Hoitash,

It is my pleasure to inform you that RTI Laboratories is now a laboratory approved for use by General Motors (GM) facilities. As of now, the approval extends to waste characterization analyses. RTI must also include the following with each lab report:

1. The expiration date of the standard and the standard source used for the analysis
2. pH of the extraction fluids
3. mass, in grams, of the sample analyzed

Additionally, the Standard Operating Procedures (SOP) must be updated to include each action item of the referenced method. These updated SOPs should be submitted electronically to me and John Takle no later than May 22, 2008. If the updated SOPs are not received by the due date, the approval will be suspended until the SOPs are received, reviewed, and deemed to be satisfactory.

Should you have any questions or concerns, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Vallone", written over a circular scribble.

Tom Vallone
GM Laboratory Contract Program Administrator
